fries | avocado-mayonnaise

*Active stable pig

Active stables for pigs stand for more animal welfare, transparency and short transport routes from the farmer to the slaughterhouse to processing. It offers the pigs various straw and slatted floor areas that they can choose freely. In addition to a feeding area on slatted floors and rooting areas with straw, the animals also have access to bright stable areas with showers and toys, darker rest areas and outdoor climate areas with north, south, east and west terraces. In the active stable there is a lot of freedom of movement over 1000 m² and activities (moving, digging, showering, playing, bathing, resting, wallowing) with twice as much space.
